Selected experience

IFS Full Stack Developer Oct 2018 – Present

Swedish Retail Client | IFS Apps 9 to Apps 10 Upgrade

- Upgrade Leadership: Spearheaded an offshore technical team to execute a complex upgrade from Apps 9 to Apps 10, successfully managing and refactoring 300+ customizations.
- Release Management: Managed all UPD activities and patch deployments, ensuring high system availability and a seamless cutover.
- Integration Modernization: Designed and implemented diverse inbound/outbound integration patterns, specifically focusing on the conversion of legacy Biz-APIs to RESTful APIs.
- Retail Specialization: Conducted technical feasibility studies for Extenda POS integration, developing robust solutions for Cash Receipts and Day Report (GL) synchronization.
- Performance Optimization: Collaborated directly with IFS R&D to optimize the Aurena ScanIT application, significantly reducing latency in warehouse mobile operations.

Nordic Professional Services Client | IFS Cloud Implementation

- Customization Analysis: Led the discovery phase to audit existing IFS Cloud customizations, identifying technical debt and proposing streamlined, "out-of-the-box" aligned solutions.
- Solution Design: Bridged the gap between legacy business processes and IFS Cloud capabilities to ensure long-term maintainability.

Norwegian Car Reseller Client | Solution Delivery

- UI/UX Enhancement: Delivered high-quality technical solutions for complex UI requirements within the IFS framework.
- Integration Development: Built and maintained complex features and integrations tailored to the specific logistical needs of the automotive resale industry.

IFS ERP Technical Developer Jun 2014 – Sep 2018 (Multiple Clients)

- UI Development: Designed and developed IFS Front-end Forms.
- Integrations: Designed and developed complex inbound and outbound integrations
- Reporting: Developed and customized Order Reports, BA Reports, and Quick Reports to support business operations
- Configurations: Created and managed Custom Objects, developed Lobby Pages and handled Data migrations.
- Performance Optimization: Conducted performance tuning initiatives to enhance the overall efficiency and responsiveness of IFS Applications.
